## PROFILE

Creative full-stack developer and digital specialist behind SEVENXP, delivering production-grade web platforms, Android applications, cinematic video edits, and premium brand design for clients internationally. Comfortable owning a project end-to-end — from architecture and UI to deployment, SEO, and post-launch support.

## EXPERIENCE & PROJECTS

### Founder & Full-Stack Developer

SEVENXP (Freelance / Self-Employed) | 2024 — Present

- Designed and built a full digital marketplace and portfolio platform using Next.js, TypeScript, Supabase, and Tailwind CSS, deployed on Vercel.
- Engineered a secure digital-product delivery pipeline with signed, time-limited download links and automated order-approval emails.
- Built a full custom admin panel (products, orders, clients, projects, SEO, messaging) with role-protected access.
- Integrated an AI-powered chatbot assistant for real-time visitor support and lead capture.
- Implemented technical SEO: dynamic sitemap, structured metadata, and JSON-LD for search visibility.

### Android App Developer

Independent Projects | 2023 — Present

- Built and published an Android arcade game with AdMob monetization, custom game mechanics, and onboarding video.
- Developed a WebRTC-based video/audio calling app with a Kotlin front end and a Node.js signaling server.

### Freelance Graphic Design & Video Editing

Various Clients | 2022 — Present

- Delivered brand identity, marketing graphics, and motion/video content for small businesses and startups.
- Produced full brand systems — logo, style guide, and multi-page website — for concept and client brands.

## CORE STRENGTHS

- End-to-end product delivery: design → development → deployment → support
- Fast learner across adjacent disciplines (dev, design, video, mobile)
- Clear client communication and reliable delivery timelines
